Maple Class Newsletter

13/11/26

Another super week in Maple!

This week we have been consolidating our multiplication skills and recapping our key arithmetic skills. Towards the end of the week, we also started to look at our next topic of calculating area. Our resilience and problem-solving in Maths are making great progress, where everyone is striving to achieve their best.

In writing, we have begun to practice our recount writing skills. As a class, we are writing a diary entry about our fantastic experience last year when the gladiator Steel came to visit our school. We have been focusing on writing in chronological order, using exciting sentence openings to help guide the reader and, as always, our beautiful presentation.

To mark world Science day on Tuesday, we spent some time looking at the career of Rosemary Coogan. She is an astronaut for the European space agency, having studied astrophysics and completing her training, and she will possibly be the very first British woman to go to the moon!

In gymnastics, we have continued to look at turns and jumps to build our sequences, and our topic work this week has been exploring the structure of rivers around the world. We worked in teams to create our very own river models!

Have a lovely weekend

Katy and Maple Class

This week's awards

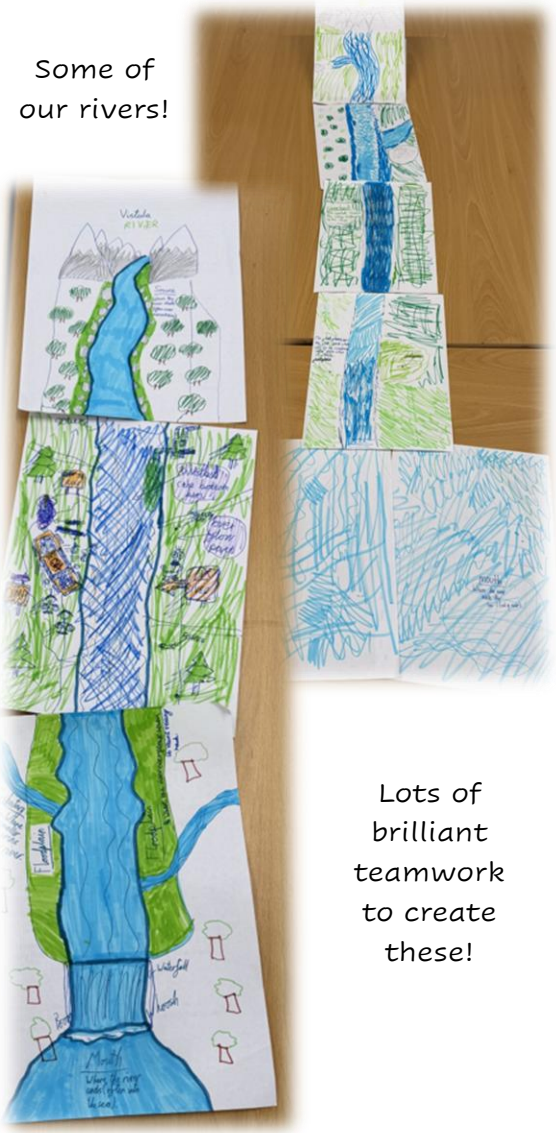
Teacher awards:

Imogen & Madeleine

Star of the week:

Robbie

Some of our rivers!



Lots of brilliant teamwork to create these!

Next week's learning

Maths: Calculating area

English: Writing: Recounts, Guided Reading: The Moon Landing, Spelling: modal verbs

Science: Solar system models

Topic: Earthquake formation

RE: Messages in the Bible

Reminders

This term's **PE** days are **Monday** & **Thursday**
