

Hazel Class Newsletter

Date: Monday 1st December

Dear Parents and Carers,

Hazel class continue to work hard on times tables during the week. A big well done to those who regularly practice their multiplication tables!

Among play rehearsals, the children are managing to focus well during their writing and guided reading sessions.

In Science, we've been busy testing the viscosity of different liquids. We tested how quickly and slowly liquids flowed and linked this to the thinness and thickness of the liquids,

Kind regards,

Sarah

Experimenting with liquids

Learning last week

Maths: Links between 3,6, and 9-times table

Art: Georgian architecture

Times tables: X9
