

Maple Class Newsletter

14/11/25

What a great week in Maple!

In Maths this week we've been learning to use a protractor to measure and draw angles. We've particularly been focusing on the importance of accuracy and correctly lining up our protractors, using our knowledge of acute, obtuse and reflex angles to check our answers.

In English, we have been putting our writer's toolkit into practise to have a go at innovating our own recount. The children selected a favourite day or event in school to write about, such as our tag rugby festival, music workshop and pantomime. It's been lovely to see how much progress has been made in our independent writing in such a short space of time, both in our grammatical accuracy and confidence to share our writing aloud.

We also ended the week on a high with a brilliant rocket building STEM workshop. The children worked together to build and then launch their rockets in the hall. It was a fantastic morning of STEM skills, creativity and teamwork – a brilliant addition to our Space topic this half term.

Have a lovely weekend!

Katy and Maple Class

This week's awards

Teacher awards:

Isabel & George

Star of the week: Oscar

Presentation: Amber

Next week's learning

Maths: Finishing work on angles & starting new fractions unit

English: Writing: Recount texts (Moon Landing model text), Reading: Moon Landing newspaper article, Spelling: Modal verbs

Science: Solar system models

Topic: Viking and Saxon influences today

RE: Religious scripture - The Hindu Vedas

Reminders

PE Days this week: Monday

Monday: Tree planting
(weather dependent)

Please use any free time to
practise your scripts!
