09/10/26

Another brilliant week in Maple!

In Maths this week we moved onto a new unit looking at properties of numbers. In this unit, we will be exploring multiples, factors, prime, square and cube numbers. Our times tables knowledge is especially important for this topic so remember to keep practising at home!

We have been doing some fantastic creative writing this week, looking at writing character descriptions and action scenes. It has been wonderful to see so many of us wanting to share our work aloud. We are all also making great progress with our grammar and handwriting, identifying where we need capital letters, punctuation and self-correcting our spellings

This week in school has been our "Kindness Week" and we have done lots of activities linked to this. We explored how we could fill up our own "kindness buckets" with actions for others, and each of us selected a member of staff from names in a hat to do something kind for throughout the week (I know lots of staff members have been very grateful!)

We would also like to say well done to the children from Maple who participated in the tag rugby on Thursday. Everyone showed brilliant enthusiasm, teamwork and skill, making us incredibly proud!

Have a lovely weekend

Katy and Maple Class

Next week's learning

Maths: Prime, square & cube numbers

English: Writing: "Defeating the Monster" stories, Guided Reading: "The White Giraffe", Spelling: homophones

Science: Gravity

Topic: 6-figure grid references

RE: Representing qualities of God

This week's awards

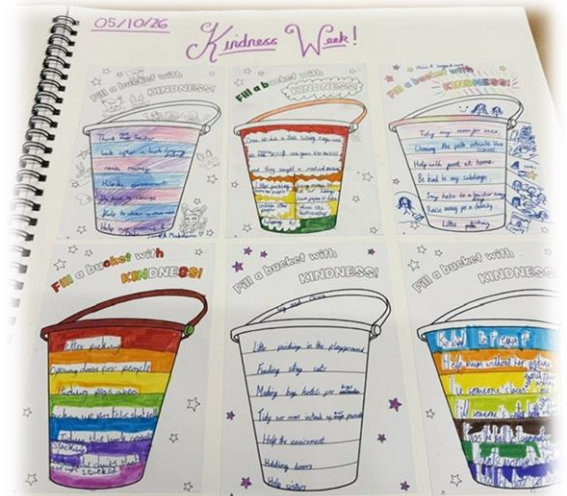

Teacher awards:

Ava & Olivia

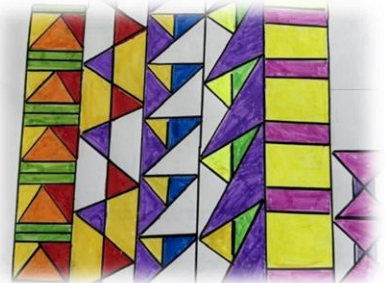

Star of the week:

Polina
